FLEXIBILITY

NOW YOU CAN HAVE IT ALL “PRE-SALE, IN-LANE OR POST-SALE”

The SimCasts™ mobile application allows auctions to broadcast a live stream during the live sale In-Lane. The SimCasts™ app gives the subscriber a realistic feeling of being present next to the car: the online bidder can navigate with a mobile camera to zoom in on a particular part of the vehicle for a Live inspection, which is impossible with a standard fixed camera. With the SimCasts™ mobile application, online bidders have access to every option that in-lane bidders have without the need to be present at the auction. This innovative software will help independent auctions become well-organized and attract more distant audiences to their lanes.

AUCTION BENEFITS

+ NOTIFICATION FOR PRESENTERS

Auction Reps are notified via text when a bidder has requested a SimCasts™ session.

+ COMMUNICATE EFFECTIVELY

Communicate with your bidders in 1-Clerk chat or through the SimCasts™ App for unparalleled bidding confidence.

SINGLE-CLERK FUNCTIONALITY

Manages SimCasts™, CAMS 3™ and AuctionLink™. The clerk can quickly locate vehicles using the vehicle sequence number in an intuitive interface.

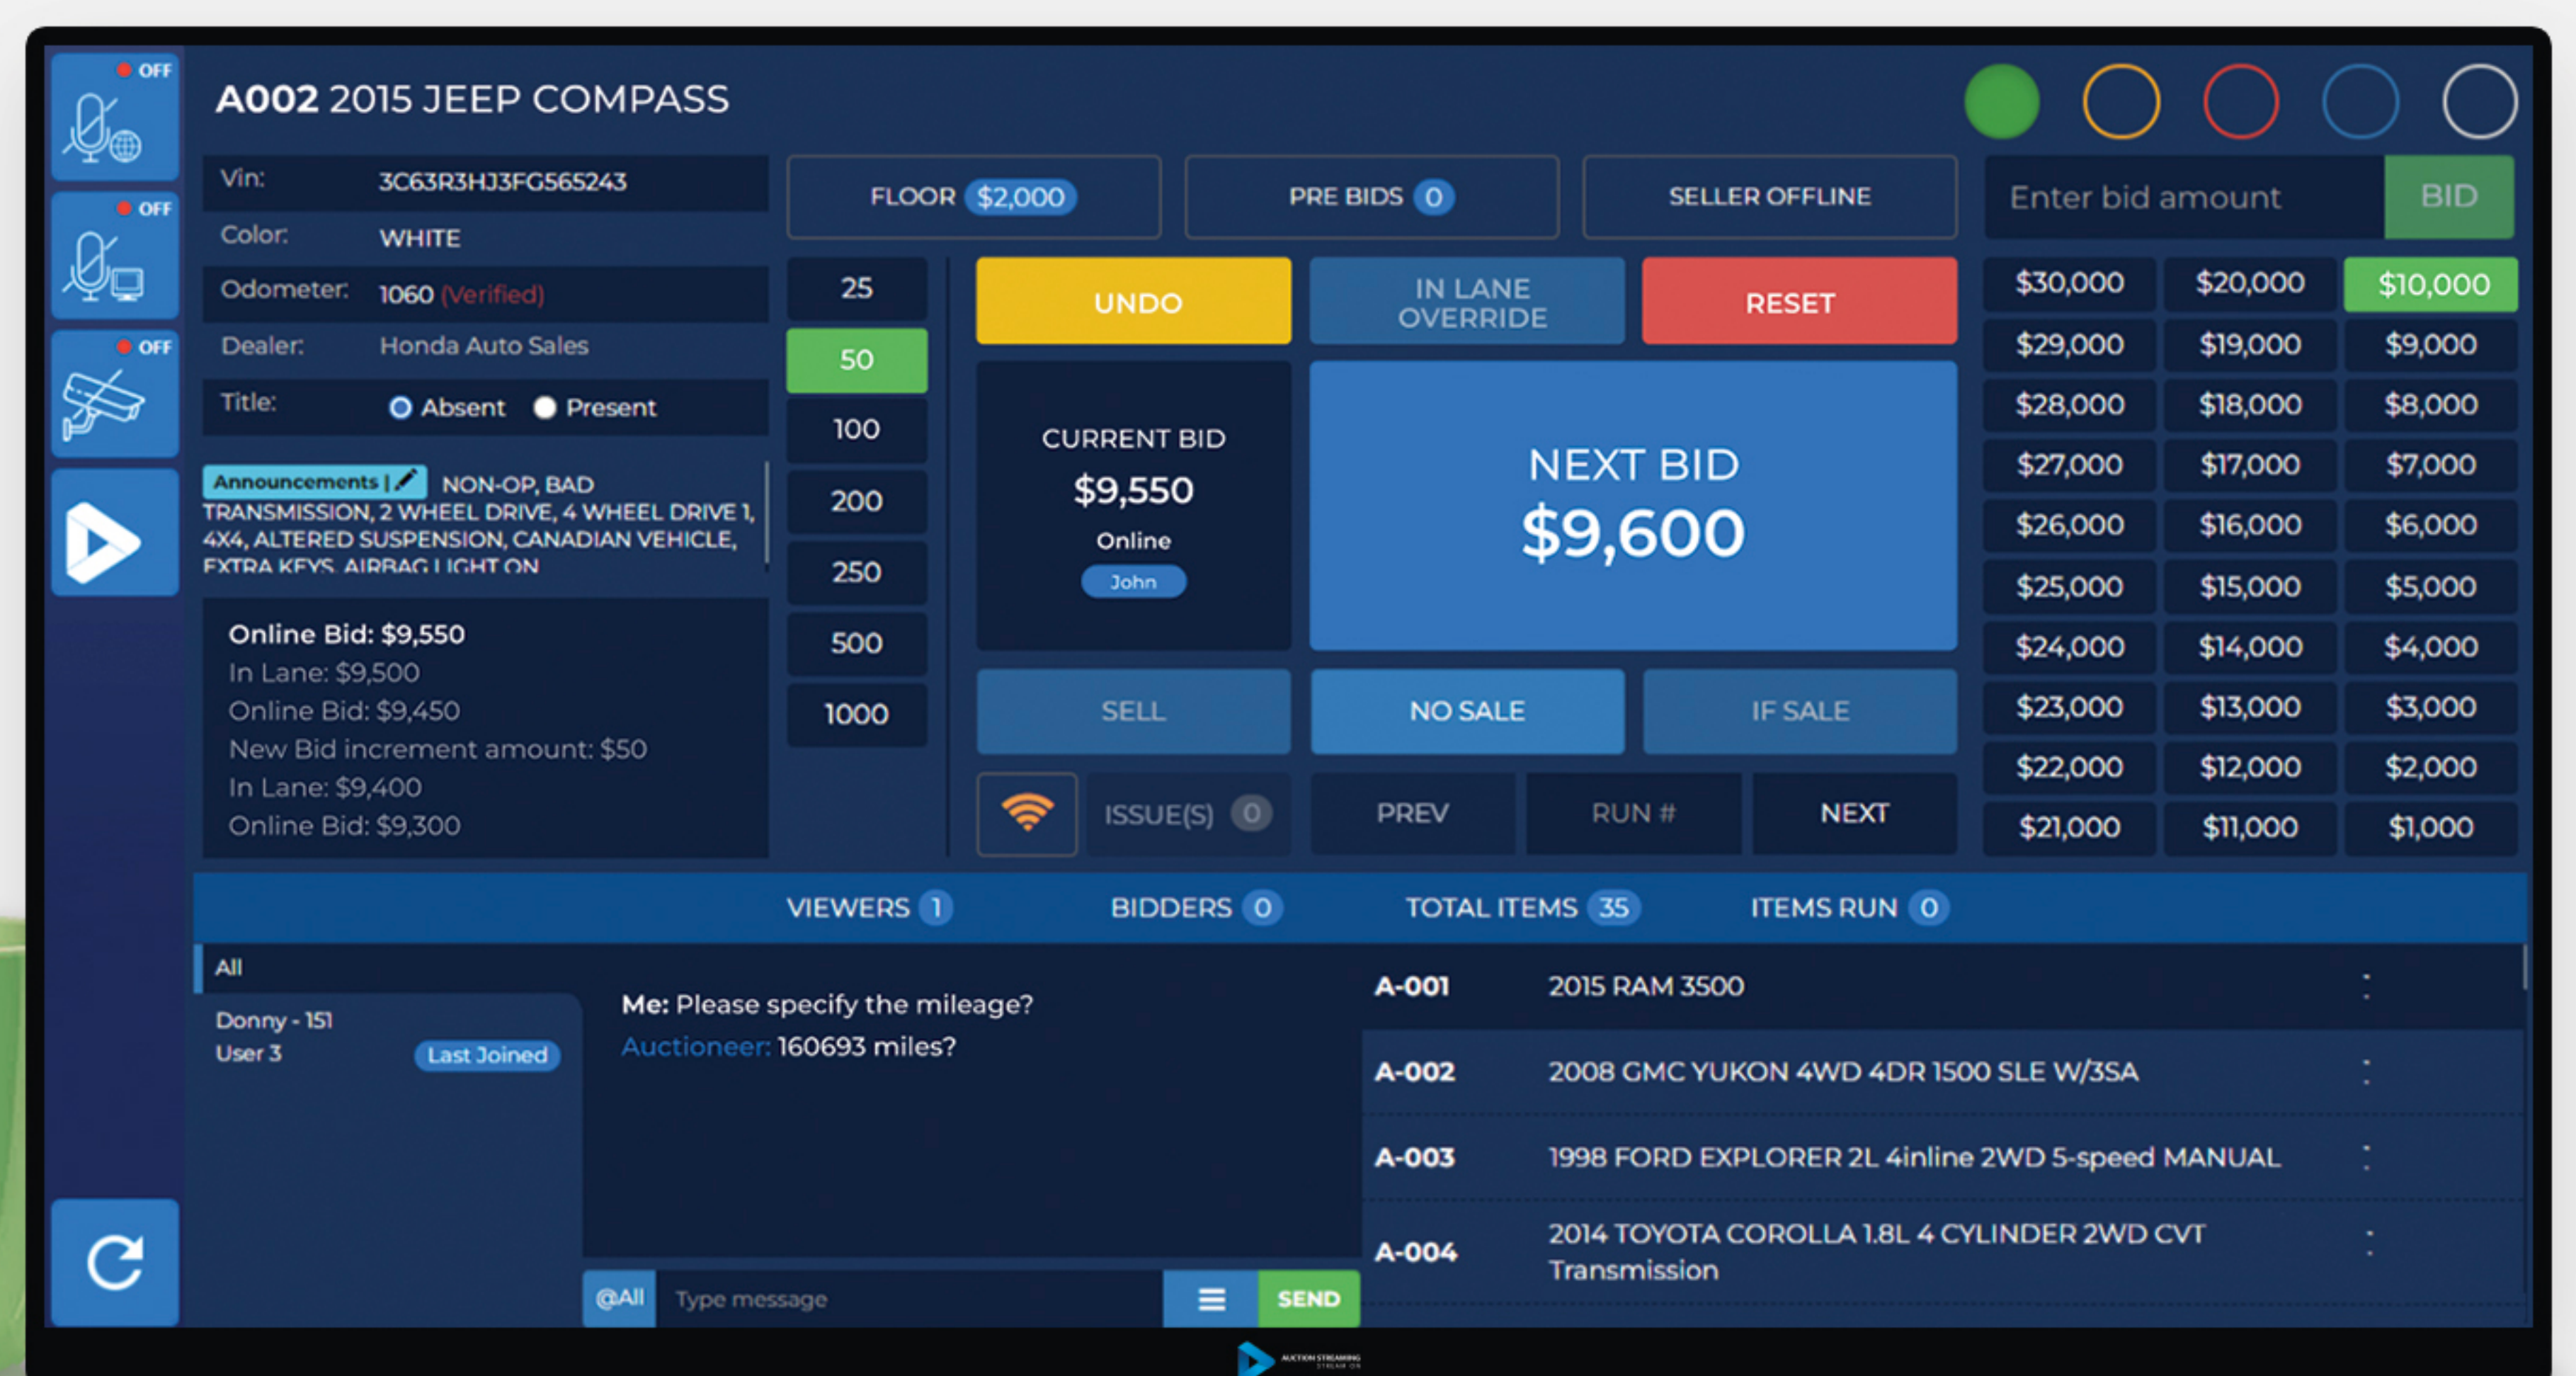

+ ENTERPRISE QUALITY STREAMING

The SimCasts™ video sessions launch and stream even with low bandwidth. Streams are unaffected by a connection loss.

+ PRE-AUCTION MODE

Auctions can utilize the SimCasts™ App to stream and showcase a vehicle to prospective buyers, in effect creating a virtual lane they can utilize at any time during the week.

KEEP YOUR ONLINE BIDDERS ENGAGED THROUGHOUT THE EVENT

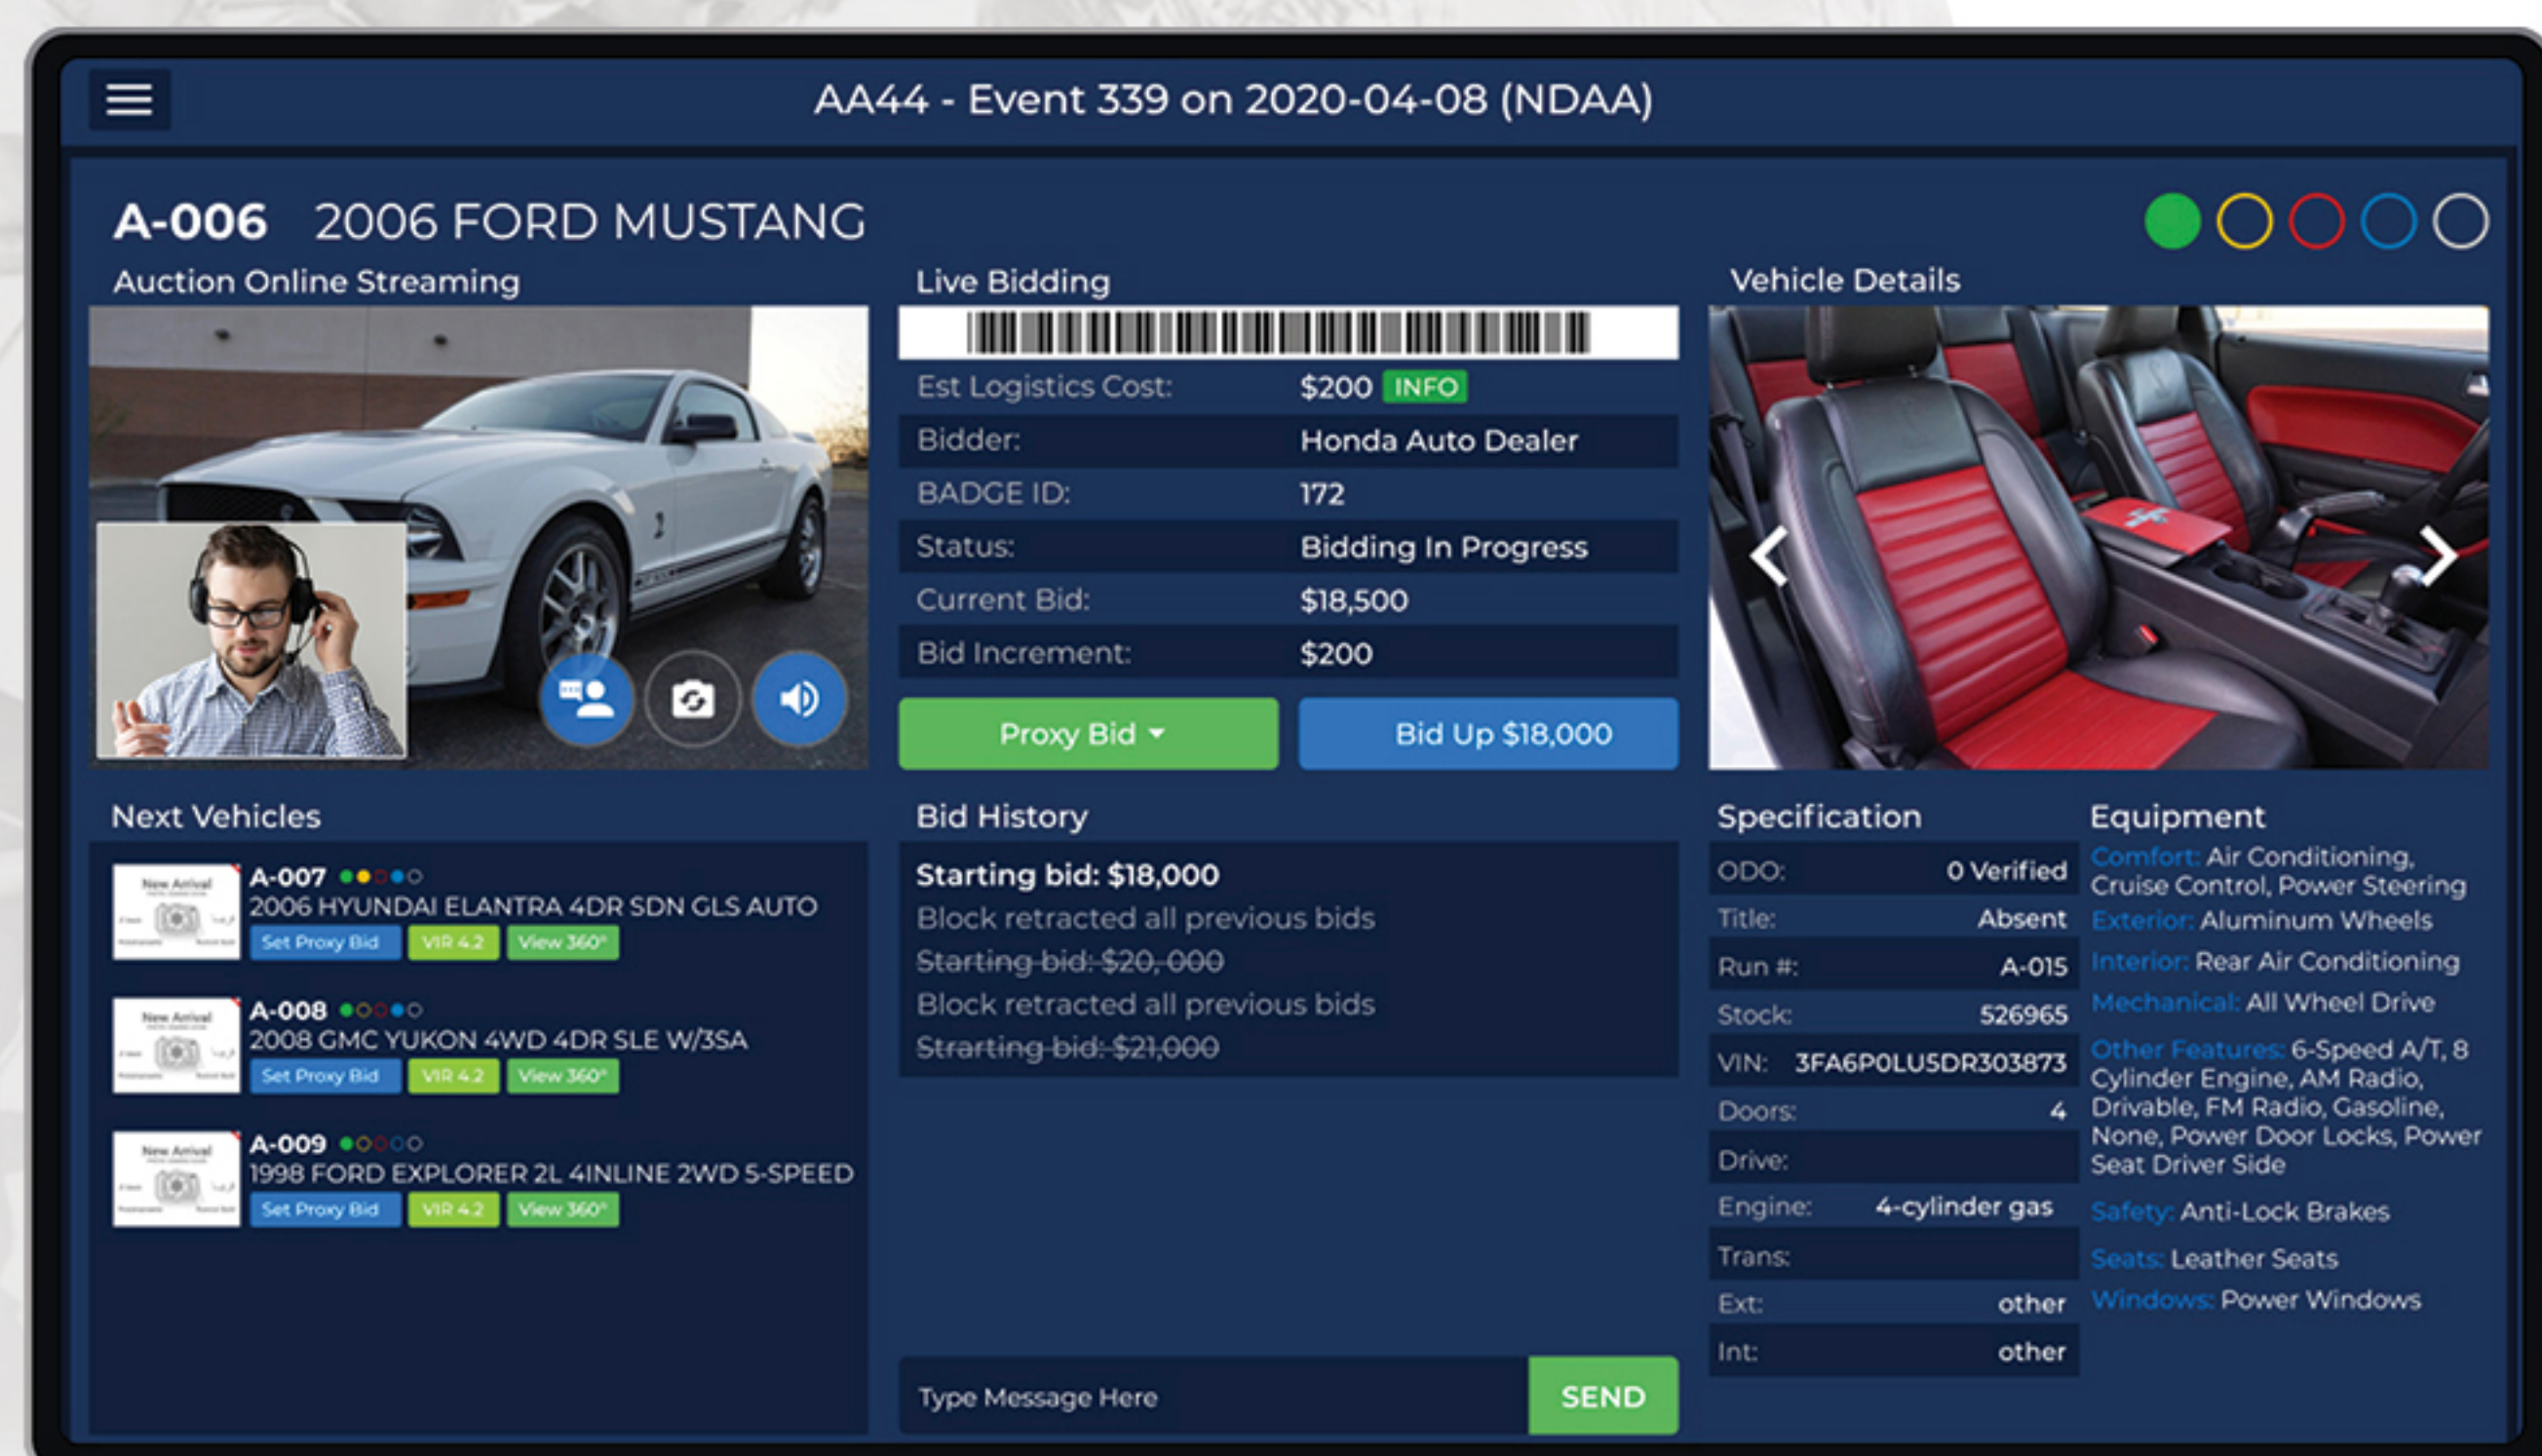

It is no secret that Auctioneers are the life blood of any auction. They not only manage the entire bidding / selling process, but they need to be entertaining, engaging and charismatic to build excitement and drive the bidding up. All of which is only truly effective when you can see and hear the auctioneer.

Our new Auctioneer Display Interface (ADI) allows your auctioneer to use the rear facing camera on a tablet to interact with online bidders as if they were "In Lane" while retaining access to all mission critical information such as vehicle details, current bid, and bid history.

Our ADI seamlessly bridges the gap between the "In Lane" and "Online" buying experience to keep all dealers engaged and make the auctioneer even more effective.

THE BENEFITS FOR AUCTIONS

- INTEGRATED WITH OUR SIMCASTS™ SIMULCAST
- AUCTIONEER IS NOT BOUND TO THEIR PODIUM
- REMOTE BIDDERS CAN SEE AUCTIONEER AND LANE SIMULTANEOUSLY
- ONLINE BIDDERS EXPERIENCE THE SAME AS IF THEY WERE "IN LANE"
- BETTER ENGAGEMENT WITH ONLINE BIDDERS
- CLEAR TWO-WAY INTERACTIONS

A.I. AUCTIONEER

The auctioneer is often compared to a conductor of an orchestra, maintaining the tempo of the event and synchronizing all performers for perfect harmony. What if you could keep the showmanship without the massive cost spent on the auctioneer and the ringman? Auction Streaming has developed the revolutionary A.I. Auctioneer (Beta) that combines the auctioneer's personality with machine learning for an unprecedented artificial intelligence experience. A.I. Auctioneer behaves much like the human auctioneer with nearly all the speech track and charisma but never tires out, never needs a break, and loses focus of its purpose to engage, sell and entertain.

A.I. Auctioneer will call out to every buyer in-lane and online and remembers their buying habits, watchlist choices, history purchases, utilizing all parameters to improve the experience. Vehicles in high demand and frequent bidders will be extended for higher sales results and lower participation or stalled vehicles will be rapidly closed out or set to re-run later in the day. A.I. Auctioneer is a tireless alternative to a human auctioneer for tremendous savings.

THE BENEFITS FOR AUCTIONS

- **FAST: MILLISECOND DECISION MAKING AND SELF-ADJUSTING SPEECH ALGORITHM**
- **COST-SAVING: REDUCES THE NEED FOR AUCTIONEER AND RINGMAN**
- **PREDICTIVE: CONTROLLED A.I. AUCTIONEER'S SPEECH AND DATABASE SCENARIOS**
- **OVERSIGHTS: NO MORE PHANTOM BIDS, FAKE OR MISSED BIDS, NO SHENANIGANS**
- **TIRELESS: NEVER TIRED, SICK, COMPLAIN, OR ABSENT**
- **TIMED: TIME-CONSCIOUS AND MONITORING WITH ALERT ANNOUNCEMENTS**
- **MULTILINGUAL: CUSTOMIZED, USER-SPECIFIC, LANGUAGE DELIVERY SYSTEM**
- **MACHINE LEARNING: CONTINUOUS ADAPTATION TO BUYERS' INPUT**
- **NONGENDER: LANE, SELLER, VEHICLE-SPECIFIC GENDER VOICE OPTION**

IF-SALE COUNTER OFFER

LABOR AND TIME SAVINGS

PRODUCT DETAILS

AUTOMATED NEGOTIATOR

Is your staff completely inundated on sale day conducting a long and drawn out buyer and seller negotiation process? When a buyer bids on a vehicle, and their offer is lower than the price set by a seller, a vehicle gets an "IF-SALE" status and the negotiation begins. You never know how long it will last and how much time your staff will waste trying to establish a common solution.

The If-Sale counter offer tool does the heavy lifting allowing your staff to focus on the relationship building with your clients.

Auction Streaming has developed an If-Sale Counter Offer Automation feature with SMS / Email within Simulcast. This feature helps independent auto auctions decrease recurring menial tasks through automation, and the streamlining of essential processes, resulting in headcount reduction.

INTUITIVE DESIGN CREATES A SEAMLESS EXPERIENCE

When a buyer is ready to purchase a vehicle, but at a lower price, he offers an amount that would require the seller's approval, and the vehicle gets a temporary "IF-SALE" status.

An SMS and Email notification is instantly generated to inform the seller about the IF-SALE bid proposal. The notification contains the bid amount, Vehicle Identification Number (VIN), Year, Make, and Model, and the deadline when the offer expires, with a link to the Simcast IF-SALE Counteroffer Management page.

On Simcast IF-SALE Counteroffer Management page the seller can accept or reject the offer, or make a counter offer with the price he is willing to sell the vehicle for. To manage this offer, the seller needs to follow the link in an SMS / Email to be redirected to a Simcast IF-SALE Counteroffer Management page.

The IF-SALE Counteroffer Automation feature is a tool that can transform your auction into a more efficient and lucrative business.

Vehicle Inspection Report™ (VIR™) is software for the accurate and reliable online inspection of a vehicle for the following parameters: exterior, interior, mechanics, tires, paint and frame, and OBD. Bid with confidence knowing each vehicle listed has been independently inspected. If there is a VIR™ icon in the vehicle profile it means that its condition and severity have been thoroughly graded: the car's general grading and the minor grades of its separate parts and areas are given in the report.

All grades are marked with color coding and are based on the standard grading system used with online auction and marketplace platforms. The information specified in VIR™ is verified with pictures of the vehicle parts/areas, so dealers can be sure in the quality and condition of the vehicle. Vehicle Inspection Report™ shows every car from every side and corner.

THE SIMCASTS™ MARKETPLACE APP

Our Digital Marketplace web platform has been established to be one of the best ways to wholesale vehicles. The SimCasts™ Marketplace app is software that has been designed with the overall dealership user experience in mind. The intuitive front-end interface combined with a robust back-end creates a richer application that fits right into the palm of your hand.

The SimCasts™ Marketplace app gives your business the ability to wholesale inventory much faster, and get paid for it in less time than what it would take without the app.
